Your POV MUST have both an EPA and DOT sticker affixed to the POV

The **EPA (Environmental Protection Agency) STICKER** should be clearly visible in the engine area. It is usually white with the word "CATALYST" or "Vehicle Emission Control" information

Sample

If your POV is missing the EPA sticker, a letter from the EPA is required at time of shipment verifying that the POV complies with applicable US requirements

The **DOT (Department of Transportation) STICKER** should be clearly visible in the doorjamb area. It is usually white with the Vehicle Identification Number (VIN) and the month / year of manufacture listed on the bottom.

Sample

If your POV is missing the DOT sticker, a CARFAX report along with the title copy or copy of an expired stateside registration will suffice.
